

## Buildings Report SPM 2021

This year's buildings work is an extension of the work that was not completed from last. Last year as well as this year will be faced with more challenges due to Covid. The work being carried out will be work to enhance the interior of clubhouse as well as completing the work that wa started in the shower building.

The shower building requires the completion of the painting of the walls in both the men's and women's side.

The clubhouse work entails the painting of the ceilings and walls in the main area. A new wall panelling will be installed in the kitchen area as well as the ceiling being painted. I am hoping to have tile installed in the wood stove area.

The Covid restrictions will have effect on how this work gets carried out. I am wanting to take a section by section approach to this work so that we can eliminate a job not getting completed. The current Covid rules in working indoors are quite restrictive but not impossible.

I would welcome any member with skills as painting, dry walling, carpentry etc. To contact me so that we can make arrangements to get this much needed work completed.

As supplies are part of my duties, please feel free to contact me if you have noticed anything is in low supply or missing. I will get them as fast as possible.

Feel free to contact me at the following:
