Equipment report 2021;

We have had another year with a somewhat restricted sailing season. most of the smaller equipment has functioned with minor adjustments along the way. The backhoe continues to be a very versatile and essential piece of equipment. The machine however, is showing it's age . We have been very fortunate to have Paul Patterson frequently on site and he has been able to fix numerous small problems as they arose. There are a number of more serious problems which will have to be looked at over the next few seasons.
